Executive Overview

The sixth national NetHui was hosted at Aotea Centre in Auckland from 8-10 November 2017. The theme was *"Trust and Freedom on the Internet,"* which was reflected throughout the event [programme](#).

The event was overwhelmingly enjoyed by attendees, with the feedback survey showing 89% of respondents being either moderately or extremely satisfied with their NetHui 2017 experience, comparing to 75% in 2015 for the last national NetHui.

Overall, nearly 400 participants attended NetHui 2017 over the three days. Registration was $55 per attendee for the Thursday and Friday. Wednesday's "Day 0" events were free to attend.

Participation

Of the 400 participants who attended NetHui 2017 over the three days, most attended Days 1 and 2 (Thursday and Friday), and over 290 registered for the range of Day 0 events on Wednesday. Most who attended Day 0 also attended the main NetHui 2017 days.

Of participants, 49% were first time NetHui attendees. Demographics of NetHui 2017 attendees reflected in the survey were:
- 44% of respondents lived in Auckland and 35% travelled from Wellington.
- 29% of respondents were aged between 45 and 54, and 22% were aged between 35 and 44.
- 76% of respondents identified as Pākehā, with the next biggest group being 14% identifying as other, and 10% identified as Māori.
- 51% of respondents identified as male, and 43% identified as female.

The cost of registration is kept low to facilitate participation, and a number of participants were given complimentary registration including facilitators, speakers, panelists, media, sponsors, students, photographers, council members and staff from InternetNZ, DNCL and NZRS. Together with InternetNZ's strategic partners, we ran promotional giveaway ticket competitions in order to promote NetHui 2017.

InternetNZ with APNIC enabled the attendance of seven New Zealand fellows by funding for travel, accommodation and/or childcare costs. One fellow from Vanuatu also attended NetHui, through sponsorship assistance from APTLD.

Speakers, panelists and facilitators

There were three keynote speakers during the plenary sessions: Minister Clare Curran; Jillian C. York, the Director for International Freedom of Expression from Electronic Frontier Foundation (EFF), based in Berlin; and Pia Waugh, the Integrated Initiatives Team Lead from Lab+, at the Department of Internal Affairs (DIA).

There were three panel sessions:
- Freedom of Expression, otherness, safety and consequences
  Panellists: Jillian C. York (EFF), John Edwards (Privacy Commission), Jon Duffy (Trade Me), Vanisa Dhiru (National Council of Women NZ). MC: Charlotte Graham (Radio NZ)
- Digital Democracy
  Panellists: Pia Waugh (+Lab), Alex Sims (University of Auckland) & Marianne Eliott (ActionStation). MC: Megan Whelan (Radio NZ)
- Trust and Deception
  Panellists: Ben Creet (InternetNZ), Jamison Johnson (CERTNZ) & Vanessa Blackwood (Privacy Commission). MC: Colin Peacock (Radio NZ).

Across the 24 sessions, there were 53 facilitators. The full programme can be viewed here: https://2017.nethui.nz/programme/

Format and planning

Programme format

The programme was developed through a call for suggestions and a "Get Involved" (expression of interest) process to the wider community through the media, community supporter organisations, social media and InternetNZ membership. These ideas were then refined through community meetings, and discussions with potential facilitators and contributors to connect related topics and design discussion sessions. Programme details were announced as confirmed, and the final programme with community-led content was launched on 10 October and can be viewed here.

Day 0 held all-day sessions organised by community working groups and organisations on Māori; copyright and open access; the second annual FLINT conference for young TUANZ members; and the OMGtech trailblazers workshop on the new Digital Technologies Curriculum.

A highlight of NetHui 2017 was the NZ Internet Research Forum (NZIRF), which linked NetHui with various New Zealand Internet researchers on Day 0.

NetHui Days 1 and 2 explored the future of Internet, digital inclusion/divide and literacy, trust, social and cultural influence, freedom of expressions as well as privacy and the harmful digital communications act and much more. These topics were discussed through panels, sessions and keynotes.

For session timekeeping this year, we continued to use Tūī calls that Radio New Zealand kindly loaned NetHui to bring sessions to a wrap.

A Barcamp session on Day 2 continued discussions from the previous day on 'Nudes: Where's the real harm?', exploring privacy and safety online, and strategies for better equipping those who share private photos to know their rights and what measures to take if they are violated. Informal Barcamp sessions also continued to discuss digital divides and rural access.

There were a number of related events and meetups around NetHui - Digital literacy special interest group, NetSquared, Digital Natives Academy and Internet Startups, Entrepreneurs, and Social Entrepreneurs.

Kaupapa & Tūī safety team

Based on feedback from previous years, NetHui 2017 continued using a transparent and active approach to the kaupapa for all attendees and online commentary. The approach to the kaupapa was designed to ensure everyone's opinions and ideas were equally valued and that everyone involved in (or commenting online about) NetHui was respected.

The four pillars of this approach were:

- Respect people
- Enable participation
- Stay on topic
- Keep it safe.

A more extensive [Code of Conduct](...) was available online, and participants and online commenters were directed to read the code if any issues arose. Attendees were also briefed on the Code of Conduct and the Tūī Team by our MC Michele A'Court, as part of the NetHui 2017 opening.

The Tūī Team was NetHui 2017's safety team. They were there to support and enforce the Code of Conduct, providing any assistance in making sure that everyone was feeling safe and secure while at NetHui. Tūī team wore yellow lanyards and a soft toy Tūī. Alternatively, there was an online form set up for those wanting to stay anonymous. All sessions were attended by at least one Tūī Team member.

Overall, we received three notifications of different incidents. No in-person Code of Conduct warnings were issued.

Accessibility

To promote accessibility, all panels and keynotes were live captioned by Chris Penman, I-Film, whom we have built a good relationship with through InternetNZ Speaker Series and NetHui Roadshow 2016. These sessions can be viewed online at:

- Thursday: https://2017.nethui.nz/thursday-livestream/
- Friday: https://2017.nethui.nz/friday-livestream/

Services to enable better access for attendees who have sight or hearing impairments were ready to be implemented, however no attendees indicated that they would like these services to be provided.

Engagement

Participant Feedback Survey results

All attendees and facilitators of NetHui were sent a [survey](#) to provide feedback on their NetHui experience. We received 95 responses, the key points of which included:

Attendance

- 49% of respondents had previously attended a NetHui (55% at 2015).
- 36% of attendees who responded heard about NetHui through word of mouth.
- Respondents' reasons for attending NetHui 2017 included - *attendees working in the sector*; *wanting to talk, to learn, to listen;* and *to connect with others in the Internet community*.
- Most respondents were from the technology sector, followed by business, civil society and academic sectors. A major trend in the 'other' sector was government.
- 44% of respondents lived in Auckland and 35% travelled from Wellington.
- 29% of respondents were aged between 45 and 54, and 22% were aged between 35 and 44.
- 76% of respondents identified as Pākehā, with the next biggest group being 14% identifying as other, and 10% identified as Māori.
- 51% of respondents identified as male, and 43% identified as female.

Experience and Expectations

- 89% of respondents were either moderately or extremely satisfied with their NetHui 2017 experience (75% at 2015).
- 82% of respondents said they were *able to voice their thought and opinions* and also felt *safe* (88% 2015) at NetHui 2017*,* with feeling *welcome* at 76% (90% 2015), *included* at 65% (80% 2015).
- 81% of respondents said NetHui was either mostly what they expected or exactly what they expected (81% at 2015).
- 78% of respondents said they received all or most of the information they needed on NetHui beforehand (78% at 2015).

Comments

- What value respondents personally gained from NetHui 2017 included - networking; new ideas; and discussions with likeminded people, diversity and different perspectives. Clare Curran and Pia Waugh's keynotes were mentioned as some of the highlights.
- What respondents disliked about NetHui 2017 included - some sessions were too loosely facilitated, lack of clear focus in some sessions and a lack of 'where to from here' on some issues.
- Suggestions for improvement included - more information about sessions before the event which could also be used for further promoting; more Māori participation and topics.
- Other topics respondents would like to see covered at NetHui included - digital divide; AI; new tech; education; safety; and cybersecurity.
- Other feedback included praises of the food, venue, keynotes and the code of conduct.

Online

All Day 1 and 2 sessions at NetHui, except for Barcamps, were streamed live online by I-Film. Every session had a collaborative note taking page. The livestream videos were available on the NetHui website and engagement between remote participants and those at the event was enabled by an embedded Mibbit (IRC) widget and through Twitter. All panels and keynotes were live captioned on the video stream. Streaming videos and collaborative note taking were accessible through the live programme.

Sessions were viewed by a total of 3,020 viewers who spent close to 40,000 minutes in total watching all four streams over two days. The average viewing time was just over 18 minutes. New Zealand viewers made up 78% of our remote audience, with 11% from Australia, 6% from the U.S. and 5% from other countries.

Throughout the three days, #NetHui was consistently trending in the top three New Zealand Twitter hashtags.

#NetHui and other related hashtags (eg. #ShoesOfNetHui) were displayed on screens throughout the venue using streaming platform Strea.ma which was moderated by InternetNZ staff.

Media

NetHui received a range of media coverage before, during and after the event, including radio, print and online media. The event was covered by the following media platforms throughout November and December:

Appendix 3: NetHui Fellowship Report overview and links

Name	Key points	Link
APNIC fellows		
Anna Wu	NetHui exceeded the expectation. It was so much more diverse than any other IT conference. Pia Waugh was enlightening and inspiring	https://cloud.internetnz.net.nz/s/wgJ3x5LoWE0Fyqq
Delaraine Armstrong	Most interesting and relevant part inspiring Maori doing amazing things in the digital world. It was great to meet so many helpful people, who offered contacts or solutions to our connectivity issues in remote tribal area such as Tai Tokerau.	https://cloud.internetnz.net.nz/s/NRSXJ6DbL73IpWV
Kathleen Kuehn	I certainly came away more informed about the primary issues facing New Zealanders and whosome of the key people / organisations are working in the areas of privacy and social media. Good diversity.	https://cloud.internetnz.net.nz/s/BqIMrKwPUwPbSnr
Sarah Batkin	The environment was very open and inclusive throughout NetHui. I really like that there are different sessions that you can attend and participate in, instead of everyone listening to the same speakers all day	https://cloud.internetnz.net.nz/s/FFgAzop2LHaDRHP
Sarah Wilson	The greatest thing about NetHui is that if you are someone whose health doesn't allow you to attend or fully attend the two days you are still able to do it via the livestream. It is inclusive and empowering.	http://www.writehanded.org/blog/2017/11/10/to-you-live-from-bed/
Tai Samaeli	I thought the keynote speeches were quite provocative although they did lack any focus on the positives of an inspirational future.	https://cloud.internetnz.net.nz/s/VZhUepnKyHykRnr
William Asiata	Across the 3 days I really enjoyed grasping the opportunity to converse with presenters and other NetHui participants.	https://cloud.internetnz.net.nz/s/KXHQhPKyy5sbrq7

Appendix 4: Actual vs. Budget

NetHui 2017 (Akld)

Actual vs. Budget

Profit and Loss

	Actual	Budget	Variance
Income			
Registration Fee	$14,314	$20,000	-$5,686
Merchandise	$172	$0	$172
InternetNZ Contribution	$175,000	$175,000	$0
Sponsorship (excl in kind)	$49,880	$60,000	-$10,120
APNIC and INZ Fellowship	$7,600	$10,000	-$2,400
Total Income	$246,966	$265,000	-$18,034
Less Expenses			
NetHui Event expenses	$224,734	$255,000	-$30,266
NetHui Initiatives - NZIRF	$11,381	$10,000	$1,381
Total Expenses	$236,115	$265,000	-$28,885
Net Surplus	**$10,851**	**$0**	**$10,851**

The final result for NetHui 2017 shows a positive result compared to budget of $10,851. InternetNZ's funding contribution will drop from $180,000 (including $5k fellowship funding) to $170,000.

Appendix 5: NetHui roles

Keynotes:	Minister Clare Curran; Jillian C. York, the Director for International Freedom of Expression from Electronic Frontier Foundation (EFF), based in Berlin; and Pia Waugh, the Integrated Initiatives Team Lead from Lab+, at the Department of Internal Affairs (DIA).
Panellists:	Jillian C. York (EFF), John Edwards (Privacy Commission), Jon Duffy (Trade Me), Vanisa Dhiru (National Council of Women NZ), Pia Waugh (+Lab), Alex Sims (University of Auckland) & Marianne Elliott (ActionStation), Ben Creet (InternetNZ), Jamison Johnson (CERTNZ) & Vanessa Blackwood (Privacy Commission).
